

I ask you to reject the NAB's petition 04-160. America is based on innovation and entrepreneurship flourishing in a free and open market. Satellite radio has done just that. To say that they cannot be allowed to compete with local broadcasters is ridiculous. Other broadcasters are upset that satellite radio is not only competing with them, but doing better than them in some fields. It is not the role of government to step in and stop fair competition. That is not what this country is about. In a free market system, we allow and actually encourage innovation and competition. It keeps prices low and quality high. By giving into the lobby of the NAB, you are saying that some companies don't have to be better, they just have to be more powerful with lobby and contribution. Please reject petition 04-160 and allow the system we have in place to flourish.

Sincerely  
Michael Connor
